In 2019, 24 donors have contributed a total of $169 million (m) to the Yemen Humanitarian Fund (YHF). Between January and December, the YHF allocated $240m to 54 humanitarian organizations implementing 154 life-savings projects across all sectors of need through two Standard Allocations and three Reserve Allocations. Over 11m people (cumulatively) are supported through humanitarian assistance funded by the YHF in 2019.
LIFESAVING MEDICAL ASSISTANCE TO HELP SAVE HUNDREDS OF IDPs’ LIVES.

The longer the war continues to evolve, the harder it becomes for people to survive. Internally Displaced Persons (IDPs) who have been forced to leave their homes, are in acute need of humanitarian assistance, especially medical care services.

Relief and Development Peer Foundation (RDP) noted that there were many collective sites for IDPs close to its Diarrhea Treatment Centers, and thus decided to use its Mobile Medical Teams and launched many outreach activities to the IDPs sites, treating and providing hundreds of patients with essential healthcare services as diarrheal, communicable, non-communicable, and chronic diseases, including Integrated Management of Childhood Illness.

In addition, cholera is one of preventable diseases that can be reduced by practicing the right hygienic habits. Thanks to RDP’s community health workers who work tirelessly to raise general public awareness toward cholera prevention and personal hygiene, over 510 awareness sessions were conducted via home to home visits to deliver key health messages on cholera signs & symptoms, personal hygiene, hand washing, and water chlorination.

From August through September 2019, our Mobile Medical Teams (MMTs) treated 1,057 IDPs in rural villages such as Mayatam, Jabal Moawad, Almatameet, Alsahool, and Almanjama of Reef Ibb district, and conducted awareness-raising campaigns for 10,627 individuals.
