As of 13 June, the number of confirmed COVID-19 cases in Yemen had reached 709, with 161 related deaths and 42 recoveries. The overall case fatality rate remains alarmingly high at just below 25 per cent, nearly four times higher than the global average. All indications suggest that COVID-19 is spreading rapidly across the country. Individuals who are symptomatic are often not seeking testing or treatment until their condition is serious because health facilities are not accessible or local facilities are full or cannot treat patients safely. Other reasons that explain why people are delaying seeking treatment include fear of stigma, concerns about safety, and the perceived risks of seeking care. Even so, the health system is overwhelmed and is in danger of collapsing under the strain of COVID-19. Aid agencies continue to ramp up COVID-19 response efforts reaching more than 16 million people with awareness raising activities. They have procured more than 13,000 metric tons of medical equipment, testing kits and medicines from a highly competitive global market. Agencies have been scaling up the number of intensive care units (ICUs) in COVID-19 designated hospitals, adding 21 new ICUs to the existing 38, bringing the total number to 59. In addition, partners are deploying two high capacity mobile field hospitals with nearly 100 beds and providing salaries to 9,000 frontline health care workers. Safeguarding the public health system at more than 4,300 non-COVID health care facilities is another priority, to maintain services for other deadly diseases and illnesses.

**COVID-19 CASES**

- **Total reported COVID-19 cases**: 709
- **Confirmed cases**: 705
- **Deaths**: 161
- **Recoveries**: 42

**Number of COVID-19 cases, laboratories and isolation units per governorate**

- **Total reporting COVID-19 cases**: 709
- **Confirmed cases**: 705
- **Deaths**: 161
- **Recoveries**: 42

**Supply and awareness**

- Estimated 16M people reached via multiple platforms.
- Ramadan drama series reached an estimated 5M people via TV and 10M views through social media.
- Religious leaders raised awareness reaching 3.4M people via 531,100 WhatsApp messages.
- 451 mobile cars with megaphones reached over 8.5M people.
- 10 M views recorded of COVID-19 visuals on various social media platforms.
- COVID-19 messages sent to 13.5M subscribers.
- Over 60,000 hotline calls received by Ministry of Public Health and Population.
- Over 14,300 calls received via radio phone-in programmes.
- 2,996 calls were received through 49,927 house-to-house visits and Mother-to-Mother sessions.
- Physical distancing practiced at almost 40% out of 969 mosques surveyed.

**Supply chain**

- 2,492 m3 of COVID-19 relevant supplies for WHO are being loaded onto 82 containers in Jeddah.
- Aid agencies are scaling up logistics and supply capacity.
- 6,475 m3 of supplies have been transported into the country, while 7,357 m3 are in the pipeline. These include: - 376 ICU beds, - more than 600 PCR test kits, - 28,000 swabs, - more than 5 million gloves, - more than 600,000 masks, - 8,000 metric tons of medical supplies in warehouses.
- 447 containers with medical supplies at ports ready to be offloaded.
- 24,000 PPE purchased for frontline partners.
- 100,000 reactions in pipeline.

**Saving lives**

- The UN and partners are urgently expanding hospital capacity in key population centres. This includes establishing 21 new intensive care units (ICUs) in COVID-19 designated hospitals, adding to 38 existing ICUs, deploying two high capacity mobile field hospitals with nearly 100 beds and providing salaries to frontline health care workers.

**Support and awareness snapshot**

- These are the confirmed tests but there could be more.
- The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.

**HUMANITARIAN COUNTRY TEAM**

**YEMEN**

**PREPAREDNESS AND RESPONSE SNAPSHOT**

**As of 13 June 2020**

**FUNDING REQUIRED**

- **$179.1M** total required for health
- **$101.6M** required for health

**PIPELINE UPDATE**

- **7,357 m3** pipeline
- **6,475 m3** available

**SAVING LIVES**

- Protecting the public health system at 4,300 non-COVID health care facilities is a priority. These will continue to provide non-COVID health care services to prevent deaths from deadly diseases including cholera, diphtheria, dengue and malaria as well as provide nutrition treatment to pregnant women and malnourished children.
- **5,049** number of health facilities (HF’s)
- **2,528** number of HF’s fully functioning
- **1,865** number of HF’s partially functioning
- **2,779** number of HF’s partially or fully providing malaria health services (testing, treatment, referral and follow up)
- **1,257** number of HF’s providing cholera response services

**Resilience**

- **2,800** containers with medical supplies at ports ready to be offloaded.
- **24,000** PPE purchased for frontline partners.

**SAFEGUARDING THE PUBLIC HEALTH SYSTEM**

- **$48.6M** received
- **27.1%** received

**Number of COVID-19 cases, laboratories and isolation units per governorate**

- **161** reported deaths
- **42** reported recoveries
- **709** total reported COVID-19 cases

**Labs with COVID-19 testing capacity**

- **21.6K** tests conducted
- **333** health rapid response teams deployed (1,665 staff)
- **6,475 m³** pipeline
- **7,357 m³** available
- **2,779** number of HF’s partially or fully providing malaria health services (testing, treatment, referral and follow up)
- **1,257** number of HF’s providing cholera response services

**Feedback:**

- **24,000** PPE purchased for frontline partners

**COVID-19 ISOLATION UNITS**

- **59** COVID-19 isolation units
- **25** are operational

**NUMBER OF COVID-19 CASES (CUMULATIVE)**

- **10** governorates affected
- **101.6M** funding required
- **27.1%** required for health

**Funding required**

- **$48.6M** received
- **27.1%** received

**Pipeline update**

- **7,357 m³** pipeline
- **6,475 m³** available
