Overview
This document represents a summary snapshot of monitoring activities conducted by IOM and border monitoring partners at the border between Haiti and the Dominican Republic. The monitoring was put in place following the movements observed at the border before and after the 17th June 2015 expiration of the registration component of the National Plan for the Regularization of Foreigners (PNRE1 in Spanish), established in the Dominican Republic. Monitoring of border movements began as of the first week of June 2015. Up until the 16th of June 2015, figures are based on partial observations of border crossing points (BCPs). The network was 100% operational as of July 2015. Due to budget constraints, IOM’s is now covering 50% of the border (50 BCPs) as of 1st September 2016.

\(^5\) The difference in figures between the current and previous SitRep is due the fact that the data reflects the date of entry into Haiti and not the date of the data entry into the database. The unusually low figures reported in this week’s SitRep are due to two consecutive holidays (November 1st & November 2nd) falling during this week of reporting.

\(^6\) The total weekly figures are comprised of all spontaneous returns and all deportations – including the officially deported individuals who did not agree to be registered but were still counted.

\(^6\) The figures represented in this table correspond to the individuals who voluntarily accepted to be registered between the period from Thursday 27th to Wednesday 2nd of November 2016.
