As of April 2020, there are a total of 67 operational partners supporting the delivery of humanitarian response in Ethiopia, spread out over 89 zones and 749 woredas. The arrival of COVID-19 in the country on 13 March and subsequent prevention and containment measures put in place have impacted the humanitarian response in the country. Seven out of eight clusters have estimated the impact of COVID-19 on their planned response and activities decreased 7 per cent in 81 woredas.

The education sector was hit hardest by delayed activities, while West-Wellega zone was most impacted due to delayed protection activities. Suspended activities reported by health and protection sectors accounted for one per cent of the total impact on humanitarian activities.

**Impact of COVID-19 on partners activities by cluster**

- Education: 79%
- Agriculture: 42%
- ESNFI: 20%
- Protection: 24%
- Health: 12%
- Food: 0%
- WASH: 0%

Note: Nutrition cluster did not report on impact of COVID-19 on the April 3W

**Impact of COVID-19 on partners activities by zone**

- West Wellega (Oromia): 26%
- East Wellega (Oromia): 25%
- Siti (Somali): 20%
- Fafan (Somali): 18%
- Borena (Oromia): 17%
- Others: 17%

Note: Others include 19 zones from multiple regions that reported less than 17 per cent impact
