Update on the Dengue situation in the Western Pacific Region

Northern Hemisphere

China (No update)

As of 12 July 2016, there were 180 cases of dengue reported in China in 2016. This number is higher than the number of cases reported in the same period of the previous four years (2012-2015) (Figure 1).

Malaysia

In week 29, the number of dengue cases was 2,188, a decrease from 2,240 cases (a decline by 2.3%) reported in the previous week. The cumulative number of cases in 2016 (63,722 cases) was less than that reported during the same period in 2015 (67,944 cases). In week 29, the cumulative number of dengue deaths was 142 cases, compared to 185 deaths during the same reporting period in 2015 (Figure 2).
Philippines (No update)

As of 2 July 2016, there were 59,585 suspected cases of dengue reported in 2016, including 248 deaths. This is 31.4% higher than that reported during the same period in 2015 (n=45,338) (Figure 3).
