DISPLACEMENT IN MARTISSANT - FACTSHEET No. 1

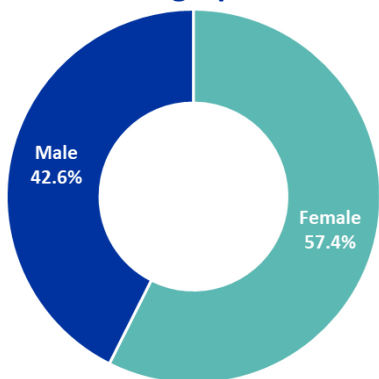

IOM - HAITI

The Emergency Tracking (ET) system is a crisis-based tool that aims at tracking sudden displacement or return movements triggered by specific crises. The ET figures reported on this factsheet are not cumulative of all the persons affected by the armed conflict around the country, rather the ET provides only a snapshot of the current displacement situation for the indicated date. The data and information reported on this factsheet are solely related to the displacement caused by the conflict that erupted in Martissant on 1 June 2021.

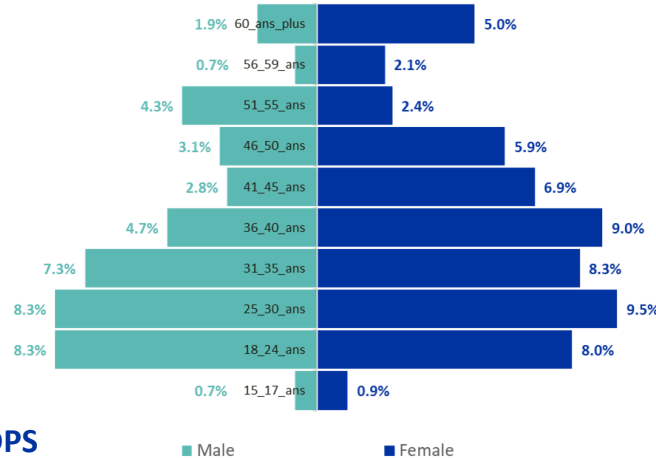

CONTEXT

Haiti continues to grapple with protracted social, political and economic motivate instabilities which do not seem close to ending. From politically motivated country wide blockades in 2018 and 2019, to periodic gang related violence in 2020, the country's capital and some departments throughout the country have been impacted by these challenges . As of June 2021, an upsurge of gang clashes has resulted in the displacement of an estimated 14,000 civilians in the metropolitan area of Port-au-Prince. Specifically, sporadic inter-gang conflicts in the commune of Carrefour (in the southern part of the Ouest department) finally erupted into severe violence which has caused the displacement of residents of the neighborhood of Martissant in Carrefour in neighboring areas, including a sports center (Centre Sportif de Carrefour). In response to the displacement and in support of the Government of Haiti and general humanitarian community in Haiti, IOM has undertaken the registration of the Internally Displaced Persons in the Centre Sportif de Carrefour location, through its Displacement Tracking Matrix (DTM) initiative. This document presents **complete results** from the registration of **423 households (855 persons)** currently residing in the site as of 17 June 2021. *(Reported number of persons amounts to 1,115 persons; it is estimated that 260 persons are currently separated from households who are currently in the site)*

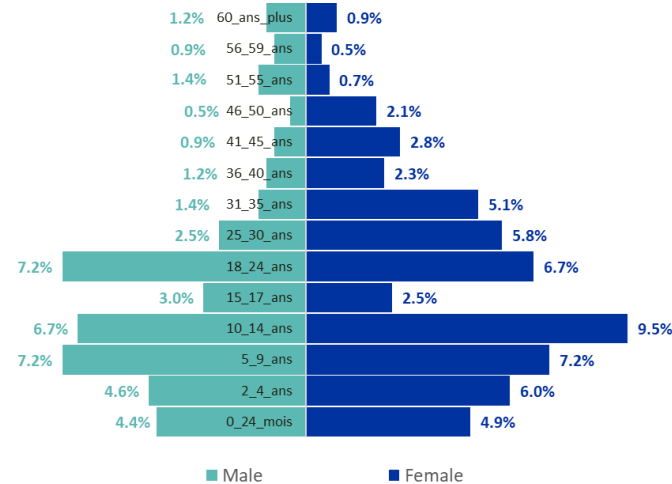

Demographics

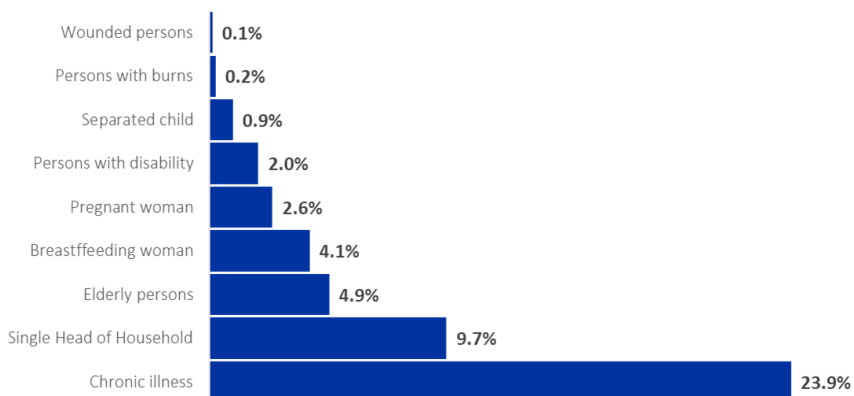

Breakdown of head of household by sex and age

Breakdown of household members by sex and age

Vulnerabilities and special needs of IDPS

Status of households

Status of households	Percentage
Head of household separated from some of the household members	34.0%
Household not separated	24.4%
Head of household separated from the rest of the household members	31.0%
Household of one (1) person	10.6%
