The FSC realizing the importance and severity of the drought impact in Sindh also carried out and finalized the assessment for Jamshoro, Umerkot and Tharparkar based on the Household Economy Approach (HEA) methodology as well which provides more in detail and in depth information on local livelihoods and baseline data on food, income and expenditure for four (4) livelihood zones of these districts.

The table above deduced from the HEA findings provides information on the food needs for the current year as a percentage of the reference year and then compares the same with international thresholds.
