Snapshot - 5 to 11 November

Despite a four-day truce which was supposed to come into effect on Friday 26 October, fighting has continued to escalate in Damascus province, Aleppo, Idlib, Daara and Deir Ezzor in Syria manifested by a new wave of airstrikes by the Syrian forces and attacks by the rebels on strategic army checkpoints and air bases.

Hurricane Sandy and its rain-trails caused significant damage to infrastructure, crops and houses in Central and North America. In Cuba alone, 1.1 million people have been affected. In Haiti, heavy torrential rains hit particularly the south of the country with 1.8 million people affected according to UN estimates. Jamaica, the Bahamas and the Dominican Republic were also hit by Sandy. On October 29 the hurricane made landfall in New Jersey and has left a trail of destruction, floods, and power outages which continue for 1.5 million of people across 13 states in the United States.

Cyclone “Nilam” struck the north east of Sri Lanka, the south eastern coast of India and the Maldives on Monday 29 October resulting in flooding and displacement. 128,000 were affected in Sri Lanka and 150,000 displaced in Nellore district in Andhra Pradesh state, India.

Between 21,000 and 28,000 people in Somalia were displaced by heavy rains since 26 October and are in need
AFRICA

BURKINA FASO  FLOODS, FOOD INSECURITY, DISPLACEMENT

According to FAO, close to 2.8 million people are at risk of food insecurity in Burkina Faso. Prolonged drought, high food prices, displacement and chronic poverty are the main causes for this crisis. According to UNICEF, in 2012 Burkina Faso has an estimated caseload of 100,000 children <5 with severe acute malnutrition. Heavy seasonal rains in the Sahel region have caused flooding and have affected approximately 21,000 people. 48 cases of cholera have been reported with three deaths since the beginning of 2012. The country has additionally been affected by the insecurity and ensuing displacement in Mali. Revalidation of refugee statistics published on 16 October by UNHCR revealed that Burkina Faso received around 36,000 Malian refugees, instead of the previously estimated figure of 108,000. The refugees are residing at seven official sites (Mentao, Damba, Fereiro, Goudebo, Gandafabou, Bobo Dioulasso, Ouagadougou) which are recognized as refugee camps by the Government of Burkina Faso. There are also several spontaneously settled sites. The Government has ordered 1,000 combat troops to the border region with Mali to secure the border and prevent kidnappings.

Updated: 05/11/2012

BURUNDI  FOOD INSECURITY, DISPLACEMENT

An estimated 1.5 million people are food insecure, of which 200,000 at a crisis level (IPC 3), as a result of two consecutive poor harvests due to erratic and below average rain fall. The recent drought is exacerbated by the already weakened purchasing power for many households as a result of high prices of staple foods. The on-going lean season (October to December) has increased food insecurity among poorer households and is expected to continue until the start of the 2013. In addition, the provinces bordering Tanzania will be further affected by the anticipated return of more than 32,000 Burundian refugees in Tanzania by the end of the year, putting additional pressure on basic social services and food availability. The fragile peace after a 12 year civil war that ended in 2005 is being threatened by repression of political opposition and retaliatory attacks by anti-government groups. The country, which is already hosting more than 50,000 refugees from DRC is currently experiencing an increased influx from refugees fleeing the violence in North and South Kivu: in October, 527 refugees crossed the border to Burundi compared to 250 to 300 in the first months of 2012, which has strained the capacity of the existing refugee camps in Bwagiriza, Musasa et Gasorwe.

Updated: 05/11/2012

CENTRAL AFRICAN REPUBLIC  FOOD INSECURITY, INSECURITY

The Central African Republic continues to face a severe and protracted humanitarian crisis. UN OCHA reported in July that an estimated 1.9 million people, half of the country’s population, are in need of humanitarian assistance. There is no recently updated data available on the number of people food insecure, but it is estimated around 30% of the population will likely be affected by low crop yields caused by erratic and insufficient rainfall. At the same time, around 14,000 have been affected by flooding following torrential rains in September. MSF reports that CAR has the highest HIV prevalence in Central Africa, with malaria and tuberculosis among the main causes of death. More than 100,000 Central Africans are displaced within the country due to insecurity. The security situation improved in 2012, following cease-fire agreements between the Government and two main rebel groups, as well as amongst different rebel groups. Despite this, the security situation has deteriorated in the north centre (due to a military operation from the Chadian and Central African army against the rebel group Front Populaire pour le Redressement) and south east (due to attacks from the Lord’s Resistance Army). As of 30 September 27,000 people were newly displaced due to LRA attacks.

Updated: 05/11/2012

CHAD  FLOODS, FOOD INSECURITY, EPIDEMIC

Due to heavy rains in early August, Chad experiences floods in at least 16 of the country’s 22 regions, now affecting 700,000 people. The number of affected has almost doubled from September 2012 when 450,000 people were reportedly affected. The floods further increase the risk of a locust infestation, which could negatively impact the upcoming harvest. The rainy season severely hampers humanitarian access. Chad continues to face a severe food and nutrition crisis with the Sahel belt in the west and centre of the country being most affected. Two years of continued climatic shocks, including erratic rainfall in 2011, have caused significant food security concerns in 2012 with an estimated 3.6 million people food insecure. The rate of acute malnutrition rose from 14.5% (August 2011) to 18.9% (July 2012) surpassing the WHO emergency threshold of 15%.

Updated: 05/11/2012

DEMOCRATIC REPUBLIC OF CONGO  CONFLICT, FOOD INSECURITY, EPIDEMIC

DRC continues to be affected by conflict in the east, large scale displacement, food insecurity and disease outbreaks. By the end of September, the number of people displaced by violence had risen by more than 25% to 2.24 million people since the beginning of 2012. Large scale displacement has taken place in eastern Congo in recent months as new conflicts have resurfaced and old ones have re-ignited. In the provinces of
North and South Kivu, clashes between more than 30 different armed groups, including the rebel group M23, and the regular Congolese army have caused new displacement. More than 50,000 people have been newly displaced since August, bringing the total number of IDPs in North Kivu to 772,459 as of 25 September. With 31% of total IDPs, Masisi Territory is the worst affected. An estimated 70,000 have fled to Uganda and Rwanda. According to a recent UN report, the two neighbouring countries are allegedly providing support to rebel group M23.

An Ebola outbreak was reported by WHO in Haut-Uélé district in Province Orientale in eastern Congo, with 75 cases noted, including 36 deaths. However, on the 23 of October it was reported that the outbreak has stabilised, with no new deaths or cases in more than a week. An estimated 5.4 million people are at IPC crisis and emergency levels of food insecurity nationwide. Humanitarian access has been limited due to mountainous and volcanic terrain, coupled with widespread and shifting insecurity. The rainy season has made many roads impassable, cutting off large populations from assistance. In addition, humanitarian personnel are increasingly targeted. There is a lack of information on the number of people affected in the eastern provinces, their location and their needs.

Updated: 05/11/2012

**GAMBIA FOOD INSECURITY**

Gambia continues to be affected by the Sahel food crisis and after crop failure, resulting from poor rains, 206,000 people were receiving emergency relief at the beginning of August. 600,000 people are vulnerable to the effects of the food crisis. Retail food and fuel prices are at an all-time high. The rising food prices further affect household food security. In May, an assessment found that families in some areas of the country had depleted their household food stocks, triggering the start of the lean season two to three months earlier than normal. There is a lack of updated data on the number of food insecure in Gambia.

Updated: 05/11/2012

**MALI CONFLICT, FLOODS, FOOD INSECURITY**

The conflict in northern Mali and a nationwide food crisis continue to affect an estimated 5 million people. 4.6 million people are at risk of food insecurity caused by below-average food production due to drought, a steep increase in food prices, flooding and insecurity. Heavy flooding affected close to 9,000 people in October in Ségou and Kayes regions in the centre. Since 1 January, 170 cases of cholera, including 13 deaths, have been reported in the Gao and Ansongo districts of northern Mali. As a result of above average rains and ecological conditions, a second generation of desert locust breeding started in September in northeast Mali, which could impact the upcoming harvest.

The insecurity in the north has led to large scale displacement. The latest data from UNHCR is showing a higher number of internally displaced people than previously reported. According to the Commission on Population Movement in Mali, a working group under the Protection Cluster lead by UNHCR, at least 203,845 people are currently displaced. Previously, the estimate was 118,795 people. The revised figure reflects in part better access to areas in the north as well as improved counting of IDPs in Bamako. In addition, according to UNHCR, more than 208,000 people have fled to neighbouring countries (36,000 refugees in Burkina Faso, 109,000 in Mauritania, 65,000 in Niger).

Humanitarian access is extremely limited in the northern provinces of Gao, Kidal and Tombouctou due to insecurity and restrictions posed on operations by armed groups. On 19 October, ECOWAS, the United Nations and other actors met in Bamako to discuss the way forward after the interim Malian President Traoré requested military assistance from ECOWAS and the UN to support a Government offensive to regain control of the northern regions held by the Islamist rebels. European Union leaders vowed to help Mali by backing up an international military force and training Malian defence forces. Negotiations on the modalities of a military operation continue.

Updated: 05/11/2012

**MAURITANIA FOOD INSECURITY**

WFP reports that about 800,000 people, almost one fourth of the households in rural areas, and 200,000 in urban areas have been affected by food insecurity as a result of last year’s drop in cereal production. Global Acute Malnutrition rates for children <5 years stand at 12.1%. The highest malnutrition rates have been recorded in Hodh Ech Chargui, Guidimaka, Gorgol and Assaba regions in the South-East of the country. Hodh Ech Chargui further hosts around 109,000 Malian refugees fleeing armed conflict in northern Mali as of 18 October. On 13 October, Mauritania President Mohamed Ould Abdel Aziz was injured after a military patrol accidentally fired on his convoy. On 4 October the Ministry of Health (MoH) in declared an outbreak of Rift Valley Fever (RVF). A total of 34 cases, including 17 deaths have been reported from 6 regions as of 30 October. The 6 regions include Assaba, Brakna, Hodh Chargui, Hodh Gharbi, Tagant and Trarza.

Updated: 05/11/2012

**NIGER FLOODS, FOOD INSECURITY, EPIDEMIC, DISPLACEMENT**

Niger is currently coping with four simultaneous disasters: the Sahel food crisis, the Malian refugee crisis, flooding and a cholera outbreak. Most recent estimates, indicate that 6.4 million people (38% of the population) are food insecure, due to consecutive poor harvests, drought and rising food prices. The situation is compounded by the arrival of more than 65,000 Malian refugees since January 2012, who have settled in the regions hardest hit by the nutrition and food security crisis. The Government issued an appeal for international aid on 27 August due to flooding which has displaced more than 520,000 people since mid-July. The regions of Tillaberi and Dosso have been most severely affected. A surge in malaria and cholera cases was reported in most of the affected areas. As of 24 October, the number of cholera cases had risen to 4,972, including 103 deaths. Floods rendered refugee camps inaccessible in Tillaberi, an area which hosts an estimated 36,000 Malian refugees. The Niger Basin Authority (ABN) predicts further flooding from mid-November based on the annual rising of the River Niger which occurs both during the rainy season and as river water from neighbouring countries such as Guinea and Mali eventually reaches Niger in mid-November to January. According to ABN, the swell will be bigger this year than in recent years. This is a normal phenomenon, but excessive rise can cause
new floods.

Updated: 05/11/2012

SOMALIA CONFLICT, FOOD INSECURITY

Between 21,000 and 28,000 people (3,000 to 4,000 families) in nine villages of Togdheer region in the mid-eastern regions of the self-declared republic of Somaliland were displaced by heavy rains on 26 October and are in need of immediate assistance. The floods have also damaged foodstuffs in stores in Qori-Lugud District and areas such as Daba-Gabad, Talo Buuro, Baligubadle and Gubato.

Although no longer classified as a famine situation, an estimated 2.12 million people will remain in Crisis (IPC Phase 3) and Emergency (IPC Phase 4) levels of food insecurity up until December 2012. While conditions have improved considerably compared to 2011, 236,000 children remain severely malnourished. The epicentre of the crisis remains in the south, largely due to the long-term effects of drought and famine, and the short-term effects of this year’s poor Gu rainy season. In contrast, central Somalia was hit by floods, affecting 60,000 in Beletweyn-Hiiraan. Suspected cholera cases continue to be reported in Badade district as of 25 October, with 180 suspected cases and 18 deaths.

Military operations by Somali forces, supported by African Union peacekeepers, against militants resulted in an increase in displacement in mid-September. Humanitarian access remains highly restricted in south and central Somalia due to insecurity and the ban imposed by Somali militants on humanitarian organisations. As of 25 October some 14,000 civilians fled the port city of Kismayo in the run up to the African Union military operation to dislodge Al-Shabaab militants from their last stronghold. Al-Shabaab rebels retreated from the southern port of Kismayu on 29 September, abandoning the last major bastion of their five-year revolt to an offensive by African Union and Somali government troops. Overall, the political situation in Somalia is improving, with the establishment of a new parliament and election of a new President defining the end of an eight-year transition period.

Updated: 05/11/2012

SOUTH SUDAN CONFLICT, FLOODS, FOOD INSECURITY, DISPLACEMENT

South Sudan continues to face a severe food security crisis, flooding and large scale displacement from Sudan. According to UN OCHA, an estimated 2.4 million people require food assistance. Food insecurity is caused by a series of factors including diminished cross border trade with the Sudan, inter-communal clashes, increasing number of IDPs, returnees and refugees, fuel scarcity and high food prices. However, the food security situation has improved, with the northern border areas moving from ‘Emergency’ IPC phase to ‘Crisis’ and ‘Stressed’ phases. The food security situation is expected to improve further following harvests in October. The influx of Sudanese refugees from North Kordofan and Blue Nile state continues, with over 206,000 Sudanese refugees currently present in South Sudan, primarily in Upper Nile and Unity state. There are reports of more refugees entering Yida camp in Unity state following escalating clashes in Sudan. According to UNHCR the majority of the new arrivals are in poor health states. At the beginning of October, the Ministry of Health declared an outbreak of Hepatitis E in Upper Nile state.

Updated: 05/11/2012

ANGOLA FOOD INSECURITY

In the beginning of September, UN OCHA reported that more than 1.8 million people in Angola have been affected by a food security crisis. In addition, an estimated 533,000 children suffer varying levels of malnutrition. The primary cause is the poor agricultural production in 2012, limiting the availability of food from own production. The worst affected provinces are Bengo, Kwanza Sul, Benguela, Huila, Namibe, Cunene, Zaire and Huambo. At the same time, the country is still recovering from a decades long civil war which lasted until 2002. There is a lack of updated information on the food security situation in-country.

Updated: 05/11/2012

DJIBOUTI FOOD INSECURITY
Several consecutive years of drought have led to a critical food security situation in Djibouti. Currently, around 70,000 vulnerable populations in rural areas are currently at Stressed (IPC Phase 2) and Crisis (IPC Phase 3) levels of food insecurity. In most of the country’s pastoral areas, food security conditions are improving due to the arrival of good Karan/Karma rains. However, conditions for urban poor households are expected to remain critical during the coming months due to ongoing increases in food prices. In Ali Sabieh (Assam region), resident populations are expected to continue experiencing crisis levels of food insecurity (IPC Phase 3) through at least December. The continued influx of refugees from Somalia is leading to an increase of humanitarian needs in both rural and urban areas. Some 200 refugees are arriving in Djibouti every day.

Updated: 05/11/2012

**ETHIOPIA FOOD INSECURITY**

The Ethiopian Government announced that as of 24 October 3.8 million of its citizens will require humanitarian assistance between August and December, up from 3.2 million in January. The cost of living increased by 19% in September 2012 compared to September 2011. The price of grains is expected to show some seasonal decline from October to December but remain at its elevated level. From January to March 2013, significant increases in grain prices are expected, which will significantly reduce the purchasing power of the market-dependent poor and the very poor. The UN expects an overall improvement in food security across the country between October and December 2012 as the meher harvest will replenish household stocks and decrease food prices. At the end of September, some 65,000 people required water trucking in parts of Oromia and Somali regions due to drought conditions. In Amhara region, prolonged heavy rainfall has resulted in flash floods at the start of September, affecting around 136,000 people. The number of refugees within Ethiopia, mainly from Somalia, remains at a record level of 372,000 people. The population of the Dollo Ado refugee complex in the southeast passed the 170,000-mark last week.

Updated: 05/11/2012

**KENYA FOOD INSECURITY, DISPLACEMENT, INSECURITY**

In the beginning of October, FAO estimated the number of people in need of humanitarian assistance at about 2.1 million. This is 43% less than in August 2012, following the start of the harvest. However, high maize prices in some areas in the north and south east continue to make food access difficult and contributed to Crisis (IPC Phase 3) levels of food insecurity. Conflict affected regions of Mandera, Tana River, and Wajir Districts are currently classified in Crisis (IPC Phase 3) due to displacement and asset losses. Malnutrition rates haves significantly improved compared to 2011 drought levels. For instance, Global Acute Malnutrition rates in Turkana North in May 2012 were 15.3% compared to 37.4% in May 2011. 35 people have died while 117 others are admitted to hospital following a cholera outbreak in villages on the Kenya-Somalia border. Around 470,000 refugees in Dadaab camps, mostly from Somalia, have limited access to basic necessities such as food, shelter, water and sanitation. 5,640 refugee families in camps have been affected by floods in the beginning of October. The Kenyan Government has issued an alert over more flash floods in parts of the country following the start of the country’s October -December short rains. Flooding and land/mudslides are likely to occur in areas of Western, Lower Tana and Central Kenya. Isolated incidents of insecurity continued to be reported across the country, with high alerts raised in Nairobi, North Eastern and Coast Provinces. Tensions are high in Kisumu, western Kenya, following the murder of a parliamentary aspirant on 29 October.

Updated: 05/11/2012

**LESOTHO FOOD INSECURITY**

Lesotho’s food security has deteriorated significantly for the second year in a row. As a result of the impact of consecutive droughts and late rains in the cropping season 2011/12, 725,000 people are food insecure (40% of the population). The price of staple food has increased by 60% compared to 2009/10. On 9 August, the Government declared a food crisis situation and called on development partners to assist. On November 1st, the Government of Lesotho appealed to donors to support its efforts of mitigating the current food crisis, as the country may not be able to raise enough resources to avert an escalation of the crisis. Lesotho’s population is extremely vulnerable - the country has the world’s third highest prevalence of HIV (23.5%) and 39% of children <5 are stunted. Lesotho suffers from widespread poverty with the proportion of households living below the poverty line exceeding 55%, out of which about 40% are extremely poor.

Updated: 05/11/2012

**MALAWI FOOD INSECURITY**

Floods and droughts have negatively impacted the food security situation of communities in Malawi. A June 2012 Malawi Vulnerability Assessment Committee report highlights that 1.63 million people (11% of total population) will need food assistance until the next rainy season. High food prices and an inflation rate of more than 21% have reduced the ability of households to access sufficient food from markets. As many as 15 out of 28 districts are affected by the crisis, with the southern and central parts of the country most severely affected. Even before the current crisis, 40% of the population was already living below the poverty line.

Updated: 05/11/2012

**SENEGAL FLOODS, FOOD INSECURITY**

Over 1 million people are affected by a nutrition crisis due to low cereal production and high prices. The lean season typically starts in July in most parts of the country, but this year it started as early as March in some areas due to below average rains in the Sahel. The vast majority of households do not have any local cereal stocks due to the early depletion of stocks starting in April/May. A July SMART survey has shown that GAM rates are above the 15% critical threshold in Podor, Ranerou and Kanel departments and above the 10% serious threshold in 13 departments. Flooding triggered by severe rainfall since mid-August has affected more than 260,000 people throughout the country. UN OCHA reports that, as of 15 October, the large majority of the displaced people were able to
Late and erratic rains, poor agricultural practices, limited access to agricultural inputs, and a reduction in planted area have all contributed to a 33% decrease in the harvest in Zimbabwe compared to last year. As a result, the food security situation is deteriorating. In the most affected areas maize prices are reported to be between 12 and 47% higher when compared to prices in maize surplus areas. In Zimbabwe, 3.7 million (29% of the population) are already chronically food insecure. According to WFP, during the peak hunger period of January to March 2013, 1.7 million people are expected to be in need of food assistance, 19% of which are rural households. The food security crisis is exacerbated by the high HIV-prevalence rate, which is 14% compared to 5% for the rest of the southern Africa region (as % of the total population aged 15-49).

MOZAMBIQUE FOOD INSECURITY

Up to 21% cereal production losses caused by climatic shocks (dry spell and cyclone damage) in late 2011 and early 2012 have aggravated food insecurity conditions in the central and southern areas of Mozambique. The country already suffers from high chronic food insecurity affecting 9 million people (39% of the population). According to the 2012 vulnerability assessment in the Limpopo and Zambezi river basins, more than 255,000 persons are estimated to be food insecure in 23 districts. Of those, nearly 140,000 persons require urgent assistance to bridge their food deficits. Overall, the majority of rural households throughout the country are experiencing minimal (IPC Phase 1) food insecurity conditions. Maize prices in August generally remained above the five-year average.

NIgeria FLOODS, INSECURITY

By the 15 of October, some 1.4 million Nigerians were displaced by flooding, with 30 out of 36 states affected since July according to the Government. Kogi state is most affected with approximately 624,000 people displaced. Suspected cholera cases have been reported and the on-going flooding has increased the risk of cholera outbreaks.

Outbreaks of violence have taken place in Nigeria’s north and central regions, including sectarian violence and attacks by armed groups and the Boko Haram Islamist sect. On 22 October, a military curfew was imposed on the violence-wracked north-eastern Nigerian town of Potiskum. On 28 of October, at least eight people were killed after a suicide bomber dove into church in city of Kaduna. On 2 November Nigerian soldiers shot dead dozens of young men in Kano, Northern Nigeria during raids in four areas considered strongholds of a radical Islamist group, residents More than 2,800 people have been killed in the conflict since 2009.

The Boko Haram conflict has intensified in urban and rural areas of Borno and Yobe states. This conflict has displaced significant populations, restricted population movement, disrupted food inflow, and restricted agricultural activities. In these areas, displaced populations will be dependent on food assistance through December. Moreover in the extreme northeast, the effects of the Boko Haram conflict will likely cause households to face stressed (IPC Phase 2) food insecurity from January to March.

ERITREA FOOD INSECURITY

An estimated 6 million people in Eritrea are food insecure (98% of the population). Local food and fuel prices are likely to remain high, putting severe pressure on vulnerable groups’ coping mechanisms. The Government of Eritrea officially denies any food shortages within its borders and refuses food aid. There is a lack of updated and reliable data on the humanitarian situation due to limited humanitarian access and a ban on humanitarian organisations assessing needs. No confirmed data on the food security situation or food price levels is available. Therefore, Eritrea is not included within the Global Overview prioritisation.

AFGHANISTAN CONFLICT, FLOODS, LANDSLIDES, DISPLACEMENT

Some 7.6 million people are currently food insecure in Afghanistan and 5.4 million people are affected by the on-going conflict, according to reports from the UN. The most recent incident occurred in the relatively peaceful north, when a suicide bomber killed at least 27 people in a mosque on 26 of October. In the first nine months of 2012, more than 1,100 civilians were killed, of which the large majority by insurgent activities. As conflict and insecurity continue, the displacement crisis in Afghanistan is growing. According to UNHCR, the number of displaced Afghans has reached over 430,000. About 300 natural disaster incidents, including floods, extreme weather and landslides, have affected over 250,000 people in 2012. 18% of children suffer from malnutrition while in the south acute malnutrition affects 29.5% of children <5. Insecurity has hampered humanitarian access throughout the country, particularly in the south. Around 85,000 international troops are
currently supporting the Government in its fight against the Taliban but all international combat troops are preparing to withdraw by the end of 2014.

Updated: 05/11/2012

SYRIA CIVIL WAR

In the past week fighting between rebels and military in several regions continued to escalate, with a new wave of airstrikes by the Syrian forces and attacks by the rebels on strategic army checkpoints and air bases in Damascus, Idlib and Aleppo. The Syrian army has lost strips of land in Idlib and Aleppo province but is fighting to control towns along supply routes to Aleppo city. Government forces also clashed with rebels near the Israeli-occupied Golan Heights. On 3 November, three Syrian tanks entered the demilitarized zone in the Golan Heights between Israel and Syria. An UN-brokered four day ceasefire agreement which began on 26 October failed to hold.

UN OCHA reports that 3 million Syrians are at imminent risk of food insecurity, including 1.5 million who need food assistance over the next 3 to 6 months. More than 1.2 million Syrians are internally displaced and over 376,000 refugees are registered or assisted by UNHCR in Turkey (110,649), Jordan (61,086), Lebanon (79,356) and Iraq (45,849). The large refugee influx risks destabilisation of the host countries. For instance Lebanon, where unrest erupted after a security chief, who was opposed to President al-Assad, was assassinated on 19 October. The border region currently hosts an estimated 14,000 Syrians waiting to cross the border into Turkey. After Turkish civilians have been killed by Syrian mortar fire in the beginning of October, there have been sporadic confrontations between Turkey and Syria.

Updated: 05/11/2012

YEMEN CONFLICT, FOOD INSECURITY

Violence and insecurity continues in Yemen with inter-tribal fighting in the north, fighting between the Government and armed groups in the southern governorates and civil unrest in urban centres of the west and central governorates. Assassinations and attempted attacks on security officials and politicians have significantly increased in September and October. According to UNHCR more than 730,000 people are displaced as of 30 September 2012. 5.3 million people are severely food insecure and approximately 970,000 people suffer from Global Acute Malnutrition (GAM). A recent SMART nutrition survey in Lahj estimated a GAM rate of 23% and 32% in Hudaydah, significantly surpassing the WHO emergency threshold of 15%. A collapse of public services following the civil unrest in 2011 has severely disrupted access to health services, clean water and basic sanitation. In addition, the flow of refugees and migrants from the Horn of Africa has seen a 30% increase compared to the same period last year. Information about humanitarian needs remains difficult to ascertain due to insecurity.

Updated: 05/11/2012

MYANMAR INTERNAL UNREST, FLOODS

At least 88 people have been killed and 35,000 displaced in the Rahkin state, Myanmar due to a new wave of inter-communal violence in addition to 75,000 people who were already displaced following the June unrest. The majority of the displaced belong to the minority Rohingya Muslims. They have settled in overcrowded Government-run camps and shelters. In August, an estimated 70,000 people were driven from their homes by heavy flooding. Hostilities have also been escalating in Myanmar’s northern Kachin State since August due to an offensive between Government troops and the ethnic rebel Kachin Independence Organization. Around 75,000 people have fled since the fighting resumed after a 17-year ceasefire between the Government and rebels collapsed. The Irrawaddy Delta - where 130,000 people died due to cyclone Nargis in 2008 - has been the hardest-hit by floods in occurring at the beginning of September and affecting 85,000 people. The rice harvest in 2013 is expected to be significantly affected as the rains have inundated around 250,000 hectares of crops.

Updated: 05/11/2012

PAKISTAN CONFLICT, FLOODS

Flash floods triggered by heavy rains in September have caused destruction across Pakistan. According to the Government of Pakistan, the flooding has affected more than 5 million people in Balochistan, Punjab and Sindh provinces and around 265,000 people have been displaced to relief camps. Many of the affected districts, particularly in Balochistan and Sindh, were already struggling to recover from the floods of 2010 and 2011. WFP reports that, although fewer districts were affected by flooding this year than in 2011, the districts are more severely affected, with large areas still submerged. Malnutrition rates in some of the flood affected districts were beyond emergency thresholds before the current floods and are predicted to worsen. Assessments are hampered by difficult access due to standing flood waters. Seven districts are classified as facing IPC phases three (‘Crisis’) and four (‘Emergency’). Since July 2008, Khyber Pakhtunkhwa (KP) and the Federally Administered Tribal Areas (FATA) have experienced significant population movement as a result of Government operations against non-state armed groups as well as sectarian violence. Currently, a total of more than 741,000 people are displaced in the north.

Update: 05/11/2012

BANGLADESH FLOODS

A heavy tropical storm hit several remote islands in the districts of Noakhali, Bhalia and
Chittagong on 11 October. More than 100,000 people are still affected, according to estimations by IFRC. Access to remote affected islands and chars is limited. Chittagong was already hit by flooding in July, affecting over 1.3 million people. In addition, the Government reported on the 9 of October that more than 226,000 people have been affected by flooding as a result of greater than usual inflows into the Jamuna River. The affected northwestern region was hit by floods for the third time this year. Accessibility to the area has been affected as a result of the flooding, with bridges damaged and roads impassable. Bangladesh is considered one of the world’s most hazard prone countries and is often subject to floods. 40% of the population is food insecure and this is aggravated by rising food prices and disasters destroying infrastructure and inundating land.

IRELAND DISPLACEMENT, INSECURITY

As of 31 October, the number of Syrian registered refugees in Iraq stands at 45,849, with Kurdistan hosting some 34,000 Syrians according to UNHCR. Some 49,000 Iraqi refugees have returned from Syria since July. While violence in Iraq has declined dramatically since its peak in 2006-2007, violent attacks remain common. According to AFP, at least 250 people have been killed each month since June 2012. An estimated 1.2 million were still displaced inside Iraq by 11 June. However there is a lack of updated displacement figures.

Although humanitarian access has become less restricted, security threats for international staff remain high, particularly in Baghdad, north/central governorates and the Disputed Territories.

Updated: 05/11/2012

JORDAN DISPLACEMENT

The number of Syrians fleeing Syria into Jordan has increased from 1,822 to 2,533 people crossing over the past week. As of 5 November, there were around 61,000 registered Syrian refugees and 32,000 Syrians awaiting registration in Jordan. UNHCR reports a significant number of people have left and are leaving the Za’atri camp through bailing out procedure, voluntary return to Syria or by their own means. There is an increase in the number of Syrians seeking registration in Amman, Irbid, Ma'afraq, Ma'an and Zarqa. As a result, Jordan’s economy, as well as water and energy resources are strained. The prices of commodities are higher in Jordan compared to Syria and the purchasing power of the refugees to cover basic needs is rapidly decreasing. On 2 October, the Jordanian police used tear gas to disperse some 500 Syrian refugees at Za’atri camp in the north of the country who were protesting against their living conditions. On 10 October, Jordan's King Abdullah initiated preparations for elections, due by early next year, following the decision to dissolve the parliament earlier. The elections will be the first step towards constitutional reforms.

PHILIPPINES CONFLICT, FLOODS, TYPHOON

The Philippines frequently experiences natural disasters, particularly typhoons. On 24 October, tropical storm Son Tinh (Ofel) made landfall in the Philippines affecting 109,803 people across 17 provinces. As of 30 October, 2,247 people are still in five evacuation centres. Over 945,000 people are still displaced by floods triggered by Tropical Storm “Haikui” which hit the Philippines at the beginning of August. By the end of September, around 8,000 persons were affected by typhoon Lawin, primarily on Zamboanga peninsula. More rainfall is expected in the remainder of the typhoon season, through December 2012. In addition, some 47,000 people were believed to be displaced in Mindanao at the end of September, after attacks by the Muslim rebel group BIFF on the Philippines Armed Forces (AFP) in Maguindanao and North Cotabato province. On Monday 15 October, Moro Islamic Liberation Front (MILF) leaders have signed a preliminary peace pact with the Government that will aim to end a decade long rebellion in the southern part of the country by 2016.

SRI LANKA DROUGHT

Cyclone "Nilam" struck Sri Lanka on 29 October. Heavy rains coupled with strong winds have killed six and affected more than 69,000 people in the north-eastern part of Sri Lanka according to the Government. A large part of the affected population (over 20,000) is from the newly resettled areas in Mullaitivu district. Several roads in and around the capital Colombo were blocked by floods.

As a result of the rains, the floods follow a period of severe drought conditions in the north of the country where 1.8 million people are affected. UN OCHA reports a 23% production loss which could increase to a 60% loss of the rice harvest if dry weather conditions continue. The affected area is recovering from a civil war which lasted until 2009 and left more than one million people food insecure. Menik Farm, once the world's largest camp for IDPs, closed at the end of September. Currently around 3,000 IDPs remaining in the camp are awaiting return to their areas of origin.

CHINA TYPHOON

Typhoon Son-Tinh, the 23rd typhoon of the year, has affected over 1.26 million in China’s Hainan Province. Rainstorms and heavy winds have forced 52,000 people to relocate thus far, according to the provincial civil affairs bureau.

Since the beginning of May, heavy storms with torrential rains have affected more than 10 million people in China. Nearly 1.9 million people in the eastern Shandong province were affected by heavy rains since July 29. Typhoon Vicente made landfall on the 24th of July, affecting more than 700,000 people in Guizhou and Guangxi provinces. In September an earthquake of 5.7 magnitude affected around 750,000 people in Yunnan Province.

DEMOCRATIC PEOPLE’S REPUBLIC OF KOREA FLOODS, FOOD

More than 32,000 people were affected by flooding in South Korea on 9 October. The floods follow a period of severe drought conditions in the north of the country where 1.8 million people are affected. UN OCHA reports a 23% production loss which could increase to a 60% loss of the rice harvest if dry weather conditions continue. The affected area is recovering from a civil war which lasted until 2009 and left more than one million people food insecure. Menik Farm, once the world's largest camp for IDPs, closed at the end of September. Currently around 3,000 IDPs remaining in the camp are awaiting return to their areas of origin.

Since July, most parts of DPRK were hit by consecutive floods caused by torrential rains. The impact of these floods was exacerbated when typhoon Bolaven hit the country on 28 August. An estimated 700,000 people are affected and, due to the large number of damaged health facilities, an equal number of people are left without access to primary and secondary health care. The floods are expected to further aggravate the impact of a severe dry spell in southwest and central provinces threatening the 2012 crop production, which has already been reported to be 40% down compared to 2011. More than three million people are estimated to face food deficits and according to WFP, 57% of households have ‘borderline’ food consumption. Chronic food insecurity in DPRK continues to affect two-thirds of the country’s 24 million people. Humanitarian access is limited. No current data on child mortality, the food security situation, food price levels and general magnitude of humanitarian needs is available. Therefore, DPRK is not included within the Global Overview prioritisation.

Updated: 05/11/2012

On 31 Oct, tropical storm “Nilam” hit southern India displacing more than 150,000 people and killing 22. In September two million people were forced to flee their homes across 27 districts in the north-eastern state of Assam after floods triggered by heavy monsoon rains, while ethnic tensions have displaced 45,000 people.

Updated: 05/11/2012

On 28 October, the north and northern central parts of Viet Nam were affected by heavy rainfall and strong winds caused by typhoon Son-Tinh. The storm affected 11 provinces, particularly Nam Dinh, Thai Binh, Hai Phong and Quang Ninh. As of 5 November 400,000 people were affected by the typhoon, almost half of them (160,000) children according to UNOCHA. The storm caused significant damage to infrastructure, agriculture and off-shore aquaculture farms. Viet Nam has a high exposure to natural hazards; it ranks among the 20 countries most at risk. Between late September and early December 2011, the Mekong Delta region of Viet Nam experienced its worst flooding in 11 years, affecting over 600,000 people.

Updated: 05/11/2012

An extended drought has affected more than 260,000 people in Guatemala with an estimated 100,000 people in need of food assistance. In September, the GoG called for the distribution of 1,950 MT of food assistance to help bridge the food deficit until the beginning of the high season for unskilled labour. Poverty and malnutrition are widespread and 51% of the population lives below the poverty line. Illiteracy, infant mortality and malnutrition are among the highest in the region and the country is frequently affected by disasters, including flooding, drought and recently a volcano outbreak.

Updated: 05/11/2012

An estimated 1.5 million Hondurans are food insecure, and recurrent natural disasters continue to threaten the most vulnerable people. According to UN OCHA, 25,000 people have lost up to 70% of their crops in September due to drought conditions. Central and southern regions have been worst affected by below-average rainfall in July-August. According to FEWSNET, below-average harvests and above-average purchases are likely to lead to an early start of the lean season around April 2013 instead of May in the south of
the country. A dengue outbreak has been reported, with around 7,000 cases recorded in September. Military rule, corruption, and natural disasters have rendered Honduras one of the least developed countries in Central America.

Updated: 05/11/2012

**CUBA TYPHOON**

Hurricane Sandy made landfall in Cuba on October 25, hitting the south-eastern part of the country. According to UN estimates, 1.1 million people have been affected. 96,980 hectares of crops were damaged by the storm, which has implications for the rest of the island, as eastern Cuba produces many of the country's staple crops. Hospitals have been affected in all provinces. Water and electricity supply is irregular. Little information is available on the existing economic vulnerabilities in Cuba. The country ranks among the five highest developed countries in Latin America and the Caribbean.

Updated: 05/11/2012

**UNITED STATES HURRICANE**

The East Coast of the United States was hit by Hurricane Sandy on 29 October, bringing winds up to 90 miles an hour and a storm surge that caused severe coastal flooding. Communities throughout the east coast were faced with widespread power outages, mass evacuations, extensive destruction to homes and businesses, and paralysing damage to mass transit systems. New Jersey was worst hit. On 5 November, 1.9 million people remained without power, after a peak of 8.5 million customers without power across 21 states affected by the massive storm.

Update: 05/11/2012

**OCEANIA**

**PAPUA NEW GUINEA FLOODS**

At the beginning of September, heavy rains in the in the Southern Highlands of Papua New Guinea caused flooding and landslides. According to the PNG National Disaster Centre, more than 200,000 people have been affected. However, due to the remoteness of the area, and the impact of the floods on the infrastructure the full extent of the impact is not yet known.

Introduction to the Global Overview Update

The Global Overview is a weekly update that provides a snapshot of current humanitarian priorities and recent events. The Global Overview collates information from a wide range of sources, including Reliefweb and media sources, and displays this information in a manner that allows for quick comparison of different humanitarian crises. The primary objective of the Global Overview is to rapidly inform humanitarian decision makers by presenting a summary of major humanitarian crises, both recent and protracted. It is designed to provide answers to four questions:

1. Which humanitarian crises currently exist? (World map)
2. What has happened in the last seven days? (Highlights and snapshot)
3. What is the situation in the country affected by a crisis? (Narrative)
4. Which countries could be prioritised in terms of humanitarian response? (Prioritisation)

The Global Overview consists of three main sections:

Firstly, the world map provides an overview of how the countries are prioritised, indicated by different shades of blue. The countries are subdivided by four priority levels: “on watch”, “situation of concern”, “humanitarian crisis”, and “severe humanitarian crisis”.

The priority levels are assigned on the basis of:

- the number of people affected by recent disasters
- the level of access to the affected population
- the <5 mortality rate
- the level of development of the country
- the number of protracted IDPs and refugees.

If a country experienced a disaster in the seven days prior to an update, or witnessed an escalation of an ongoing crisis, a country is highlighted by a yellow dot on the map.

Secondly, the snapshot briefly describes what has happened in the last seven days from the date of publication, by outlining the crises that have occurred in the different highlighted countries.

Thirdly, narratives for each country included in the Global Overview reflect recent major developments and underlying vulnerabilities of a country. Narratives are written based on secondary data.

The Global Emergency Overview is a mobile application.

To download the mobile application for Android phones click here.

Update

The Global Overview will be updated once a week and the results will be available every Monday before midday (Central European Time/Central European Summer Time). In case of major new humanitarian events or an escalation of an ongoing crisis which triggers a change of prioritisation, the Global Overview will be updated on an ad-hoc basis.
