KEY DRIVERS OF THE CRISIS

Chronic vulnerability: recurrent shocks (droughts, floods, epidemics, locust), chronic poverty and market instability have contributed to the deterioration of livelihoods and to a lack of opportunities for youth.

The presence of State administration and access to basic social services remain limited in areas of insecurity in parts of the north and center of Mali which increases the vulnerability of communities.

Inter-community conflicts and socio-political factors continue to fuel sporadic displacements. Continued insecurity and limited access to social services in parts of the north and center of Mali impede the durable return of displaced persons and refugees.
