Refugees in Camps

Internally Displaced Population (IDPs)

Humanitarian Situation

Heavy rainfall in Kenya's northern districts is impacting negatively on humanitarian response to drought victims, but has also improved access to water and pasture. Heavy rains have led to delays in food aid distribution in Wajir, Garissa and Mandera because roads are impassable. Meanwhile, insecurity along the Kenya/Somalia border region continues to shrink humanitarian space, adversely affecting distribution of relief aid to hundreds of thousands of drought-affected Kenyans and hundreds of thousands of refugees in the Dadaab complex.

Food Security

There are 3.75 million food insecure people in Kenya. In September, approximately 45 per cent of targeted beneficiaries received WFP food or cash assistance. General food distribution (GFD) and food-for-assets (FFA) activities in particular were affected by operational challenges, and some districts (Tana River, Malindi, Kilifi, East Pokot and South Turkana) were not able to carry out distributions. (Source: WFP)

Insecurity

A couple of explosions rocked Nairobi on 24 October, killing one person and injuring another 23 people in two separate incidents. The perpetrator, arrested and convicted in the mean time, confessed links to militants from Somalia. Security incidents in North-Eastern Kenya have impacted on humanitarian operations. Insecurity in Kenya's northern pastoralist areas continues unabated, most notably with the 14 October conflict in Isiolo that led to the displacement of more than 1,500 people.

Agriculture and Livestock

Rains have begun improving pasture for animals and food security, but with eight million animals having been lost as a result of drought, combined with flooding in some areas, pastoral livelihoods remain challenged. Meanwhile, with the rehabilitation of 12 irrigation schemes nearly completed in Turkana, Marakwet, Baringo and Garissa, Siaya and Kisumu counties, the agricultural and livestock sector is seeking funds to replicate the rehabilitation of ten more community-managed irrigation projects in selected counties in North Eastern, Eastern, northern Rift Valley and Nyanza Provinces. (Source: FAO, Fewsnet)

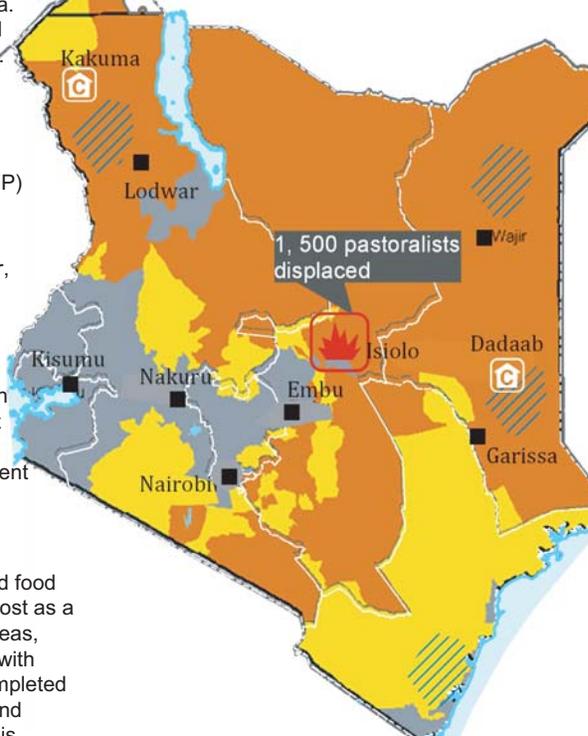

WASH

The onset of rains has improved water access in the arid and semi-arid areas, prompting some NGOs and District Water Officers to plan water trucking exit strategies for the coming months. Adequate hygiene practices and improved sanitation remain priorities in the wet weather. Hygiene Promotion Training-of-Trainers courses have been conducted in Turkana and Isiolo in collaboration with MoPHS (Source: MoWI, UNICEF)

Early Recovery

The Sector is working with District Disaster Committees to enhance their capacity to prepare and respond to disasters'. (Source: UNDP)

Estimated food security conditions, 4th Quarter 2011 (October -December 2011)

Acute Food Insecurity Phase

- None or Minimal
- Stressed
- Crisis
- Emergency
- Famine
- Flood affected areas
- Conflict area
- Refugee Camps

The In Country Network for the Protection from Sexual Exploitation and Abuse (PSEA) is planning key priorities for the coming year. Increased humanitarian needs, displacement and conflict have raised the risk of sexual exploitation and abuse (Source: OCHA, KRCS)

Refugees

After disruption of services following the kidnapping of MSF Spain staff in Dadaab on 13 October, life-saving health services are continuously being provided although aid agencies have scaled down operations. Meanwhile, at the request of the Government of Kenya, IOM has temporarily stopped all transportation assistance for refugees arriving to Liboi from Somalia, due to the ongoing Kenyan military operation in Somalia. Currently, Kenya hosts more than 601,717 refugees, of whom 463,642 are in Dadaab, 84,273 in Kakuma and 53,799 in Nairobi. (Source: UNHCR)

Education

The Ministry of Education is proposing to retain children in schools for school feeding programmes during the next school holidays which begin in mid-November; however, this is still under discussion with partners who may be required to support the operation. School-feeding during holidays ensures that life saving measures such as food assistance, nutrition and water and sanitation programmes continue to positively impact on children affected by prolonged drought conditions. (Source: MoE, UNICEF).

Health

The dengue fever outbreak in Mandera and its environs is believed to have affected about 40 per cent of the local population of about 80,000 people; five deaths suspected to be connected with dengue were reported. The Ministry of Public Health and Sanitation (MoPHS) is conducting vector control activities including fogging, larviciding and indoor residual spraying. The measles outbreak, which started in January, continues, with sporadic cases being reported in adults mainly from Kalokol, Turkwel, Kerio and Central areas in the North Rift. (Source: MOPHS, WHO)

Nutrition

The first cycle of blanket supplementary feeding (BSF) proceeded well (start dates in targeted districts range between 22 August and 29 September). The second phase of BSF has started, with the following progress: in Marsabit, the BSF distribution is complete; in Samburu, the second cycle of BSF started on 17 October and is ongoing; in Turkana, Isiolo and Mandera, the distribution has been completed for a few areas while other parts of the two districts await more stocks. (MOPHS, UNICEF)

Humanitarian Financing

As of 31st October, \$503 million (68%) of the requested \$741 million has been funded in the Emergency Humanitarian Response Plan (EHRP 2011+). Another \$122 million has been committed outside the EHRP appeal to support humanitarian action Kenya.
