This map presents a situational update of reported protests and violent clashes in cities and towns across the Syrian Arab Republic as reported on Sunday 11 December 2011, related to the call for a general strike by opposition groups. Also depicted are the majority of places that have been opened along the border in Turkey and Lebanon. Further, the spatial distribution of the dominant ethnic/religious communities in the country has been included as background context to the larger social and political uprising occurring within the country. Event locations and figures presented in this map are based exclusively on a number of open reporting sources since the beginning of the uprising in March 2011 and have not been verified on the ground.

It is possible that not all incident locations have been depicted. The depiction and use of boundaries, geographic names and related data on this map are not warranted to be error-free nor do they imply official endorsement or acceptance by the United Nations. UNOSAT is a program of the United Nations Institute for Training and Research (UNITAR), providing timely imagery and related geographic information, research and analysis to UN humanitarian & development agencies & their implementing partners.
