¹ Due to difficulty in tracking spontaneous returns, breakdown of refugee returnees and IDP returnees is not available at the sub-prefectural level. UNHCR reports that in 2011, 7,479 Central African refugees from Chad spontaneously returned to Ouham Pendé and 2,305 from Cameroon to Ouham. The registration process for these returnees is ongoing.

² Data from UNHCR CAR, January 2012.

³ Field marked with “-“ signify either there are no displaced in this region, the displaced are not significant enough to be recorded by humanitarian agencies or the displaced in the region are no longer considered displaced as they are well established with the local population and there is no knowledge of their desire to return.

⁴ Figures for Kaga-Bandoro and part of Kabo sub-prefectures are initial estimates following wave of displacement triggered by military operations in January 2012. Movement is continuous, figures are fluctuating daily and more precise information expected in late February 2012 when affected areas are more accessible.

⁵ Refugees and asylum seekers from diverse nationalities.
