This map illustrates satellite-based area of refugee camp and semi-automated tents detections in Merkez district, Hatay province of Turkey. No considerable changes in the organization (extension and number of tents) of Boynuyogun camp were observed between images acquisition dates. Possibly due the proximity to the Syrian border and the governorates of Idleb.

This is a preliminary analysis & has not yet been validated in the field. Please send ground feedback to UNITAR / UNOSAT.
