The Humanitarian Response Fund (HRF) is an NGO funding mechanism managed by OCHA that aims to provide immediate funds to respond to short-term humanitarian needs triggered by conflict or natural disasters, particularly in areas where funding gaps exist. The humanitarian activities focus on meeting short-term emergency needs and re-establishing basic living conditions; preventing and strengthening preparedness for the occurrence of such situations; and laying the groundwork for supporting durable solutions by meeting initial recovery or transitional needs.

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations.
