

IDAI Cyclone - Mozambique

Shelter and Pipeline gaps

As of 10th April 2019

Heavy rain (more than 200mm in 24 hours) and strong winds up to 220KM/h caused large scale housing damage and destruction. Large areas of land remain flooded and inaccessible by road.

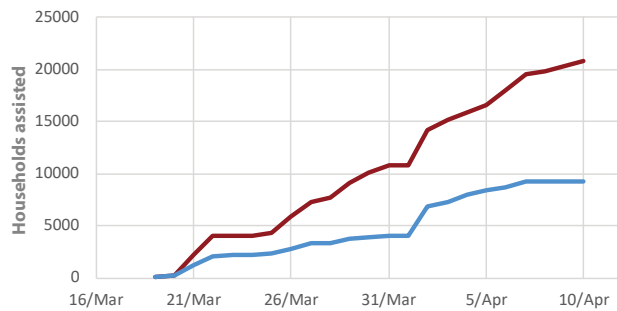

Total houses damaged/destroyed
240,731

Number of people assisted to date
104,275

Households targeted in initial appeals
87,500 HH

There are critical gaps for all shelter items in agency pipelines. Given extremely limited stocks, the Shelter Cluster has agreed to initially reduce existing country standards for response with the goal of providing improved assistance at a later date. Emergency shelter assistance is currently being counted as a minimum of 1x tarpaulin per HH or 1 tent per HH.

— Total number of households who received assistance
— Households who have received 2 Tarpaulins or a tent

Shelter Cluster targets

46,020 People
Received 2 tarpaulin or a tent

58,255 People
Received 1 tarpaulin

437,500 People
with damaged or destroyed houses targeted in initial appeals

1,203,655 People
With damaged or destroyed houses

Current coverage and gaps

Blankets
 117,153 committed/distributed
364,000 Gap

Toolkits
 17,877 committed/distributed
220,000 gap

Since the initial appeals, reported housing damage has more than doubled, highlighting a **gap of 728,655 people or 145,731 households who are outside of the appeals**. Even if high rates of unassisted self-recovery take place, there will remain large scale unmet shelter needs.
