

At 10:03 p.m. on 10 February 2017, a 6.7-magnitude earthquake with a depth of ten kilometres and an epicenter located near Surigao City caused loss of lives and damage to properties in the Caraga region, particularly in Surigao del Norte province. The Philippine Institute of Volcanology and Seismology reported no tsunami threat but they predict aftershocks will continue for several weeks. A Red Alert status has been raised by Caraga Disaster Risk Reduction and Management Council Operation Center. Surigao City declared state of calamity.
