

SITUATION OVERVIEW

In 2019, 1.77 million people were identified as needing humanitarian assistance in Burundi. Of the 710,000 people targeted, an estimated 341,000 received life-saving support. The number of people in need have decreased by 32 per cent compared to 2018, due to an improvement in food insecurity, nutrition, health and displacement. The 48 per cent of people assisted benefitted mainly from food assistance, nutritional supplements, malnutrition treatment, protection, and WASH-related services. In the first half of the year, 116,000 people were internally displaced, and 78,000 refugees arrived from the Democratic Republic of Congo. This year, humanitarian partners are appealing for US\$106 million for 61 projects to be implemented by 28 organizations. As of 30 June 2019, \$32.4 million of the funds were received. Humanitarian programming will continue to prioritize assistance to the most vulnerable, particularly IDPs, returnees, severely food insecure, children under five who are acutely malnourished or at risk of acute malnutrition, victims of natural disasters and refugees in Burundi.

KEY FIGURES

PEOPLE IN NEED [HRP 2019]

1.77 million

Women, men, and children are in need of humanitarian assistance in 2019.

PEOPLE TARGETED [HRP 2019]

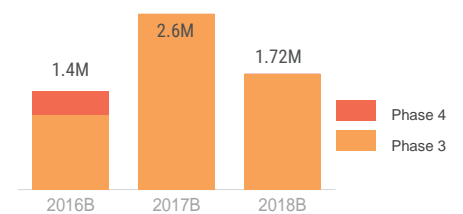

710,000

Women, men, and children are targeted by the humanitarian plan in 2019.

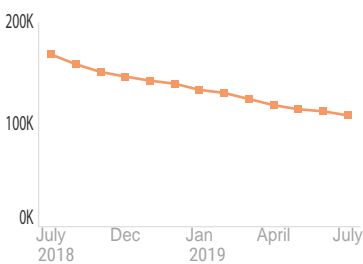

FOOD INSECURITY [Aug 2018]

1.72M people estimated to be food insecure

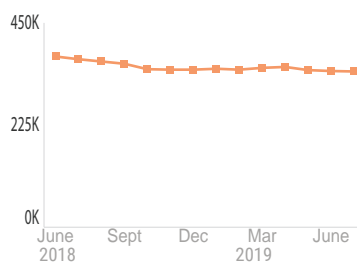

DISPLACED PEOPLE [Jun 2019]

116K Internally Displaced Persons

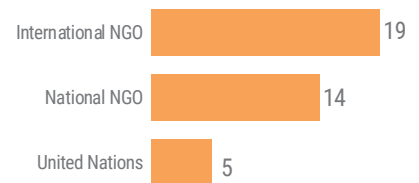

REFUGEES [Jun 2019]

344k Burundian refugees in neighboring countries

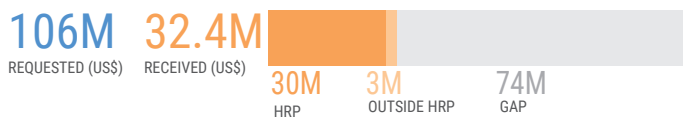

OPERATIONAL PRESENCE [Jun 2019]

38 Organisations reported humanitarian activities from January to June.

STRATEGIC OBJECTIVES

1 Provide life-saving assistance to the most vulnerable populations to reduce acute needs and contribute to resilience building efforts:

Humanitarian programming will prioritize the provision of assistance to those with one or more vulnerability trait among IDPs, returnees, severely food insecure, children under five who are acutely malnourished or at risk of acute malnutrition, victims of natural disasters as well as Congolese refugees in Burundi. Humanitarian assistance constitutes the first “pillar” of the resilience framework under development, which aims at increasing the resilience of the Burundian people to better cope with shocks and ultimately to reduce needs. The response in 2019 will include access to quality basic services, such as nutrition, protection, NFI/shelter, WASH and health as well as food assistance to those severely food insecure.

2 Ensure the protection of the affected people throughout the humanitarian programming cycle:

Humanitarian action will be guided by the notion of centrality of protection to guarantee that the rights of the affected people will be respected and their dignity preserved. Protection will be mainstreamed throughout the sectors along with gender and age and will be considered in needs assessments, program design and response monitoring. Through the adoption of the HCT Protection Strategy, humanitarian actors are committed to ensure that those with protection needs will be targeted through humanitarian action to address critical protection concerns.
