### Notes:

The Pacific Syndromic Surveillance System (PSSS) was started in 2010. With the support of the Pacific Community, it collects sentinel surveillance data on 4 syndromes (including one optional), from 23 Pacific Island Countries and areas.

The aim is to monitor trends and to trigger alerts to rapidly detect and respond to suspected outbreaks. In 2017, the system was moved to an online platform called EWARS. Data is entered online by country focal points and is then analysed using an online application.

This bulletin has been published automatically from EWARS.

---

Le système de surveillance de la syndromie du Pacifique (PSSS) a été lancé en 2010. Avec le soutien de la Communauté du Pacifique, il collecte des données de surveillance sentinelle sur 4 syndromes (dont un optionnel), provenant de 23 pays insulaires du Pacifique.

L'objectif est de surveiller les tendances et de déclencher des alertes pour détecter et répondre rapidement aux épidémies présumées. En 2017, le système a été transféré vers une plate-forme en ligne appelée EWARS. Les données sont entrées en ligne par points focaux de pays et sont ensuite analysées à l'aide d'une application en ligne.

Ce bulletin a été publié automatiquement à partir d'EWARS.
