Identify children at risk of child marriage, labor, trafficking, neglect, exploitation, abuse (sexual, physical and emotional) and psychological distress.

Assess the vulnerabilities and abilities of individual children and families

Interviewing children and/or documentation of cases involving children under the age of 18, should be done in the presence of a trusted adult or caretaker, as chosen by the child.

Develop and start a case plan for each child identified including direct support and referral for services

Key things to remember

- Maintain confidentiality at all times
- Safety, Respect, Dignity and Best Interest of the child.
- Do not pass judgement on the child.
- Listen openly to what the child has to say.
- Don’t ask probing questions.
- Reassure the child
- Seek consent.
- Do not make false promises.
- Use child-friendly language.
- Don’t leave a distressed child alone.
- Where possible, have the person accompanying the child be the same sex.

Closure based on the criteria below:

- The goals have been met based on the careplan,
- The child has turned 18 years of age;
- The child has been reported missing for three consecutive months and is suspected to have left the camp.
- The child has died.
- The closure process will include a review and confirmation of family and community support in ensuring the child can live her/his life in safety and dignity.

Regularly monitor and review case by assessing the vulnerabilities of individual children and families
