

TRIPOLI

HUMANITARIAN KEY FIGURES AND RESPONSE

AS OF 24 APRIL 2019 (since 4 April 2019)

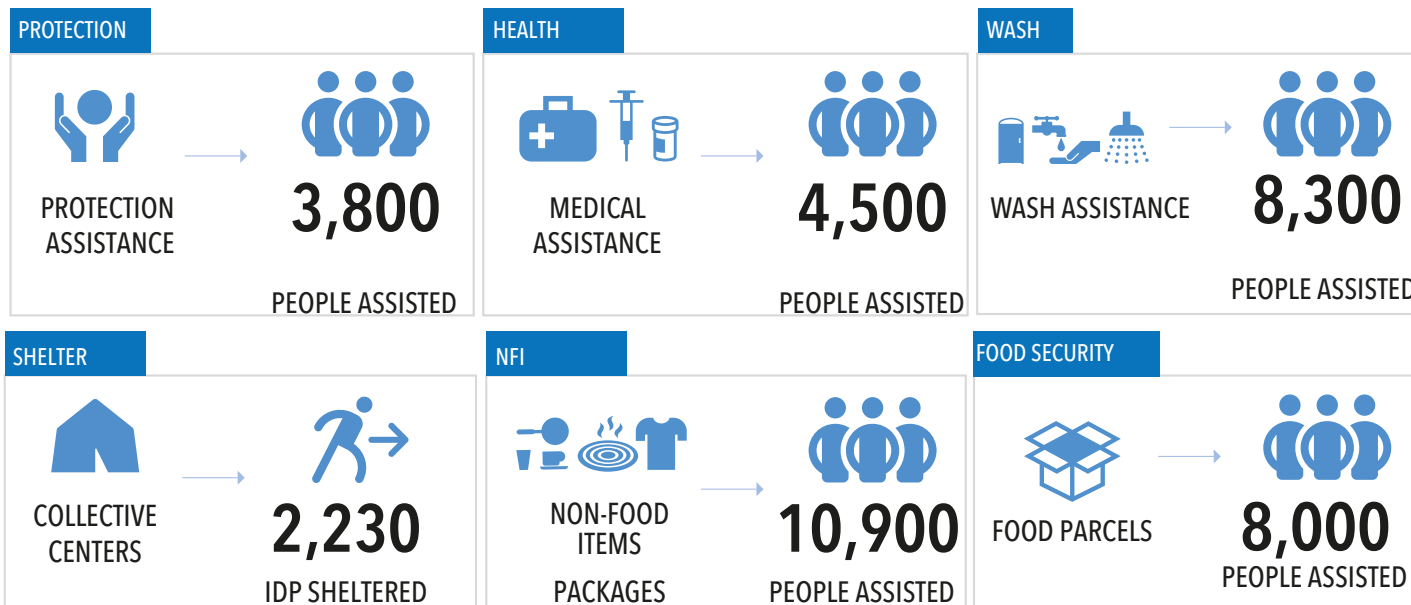

KEY FIGURES

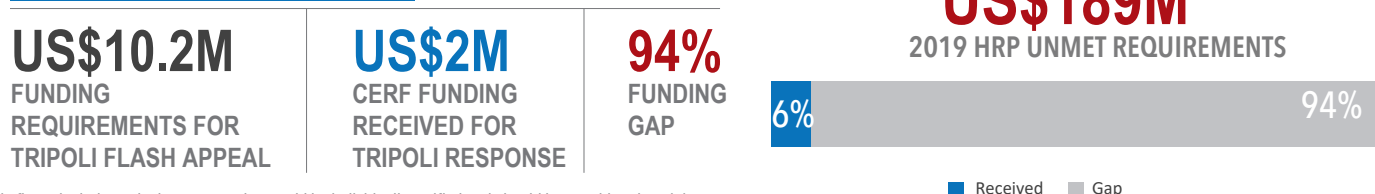

KEY MESSAGES

1. The UN and humanitarian partners are closely following up on corroborated reports of approximately 12 people who reportedly sustained injuries on 23 April as a result of violence in the Qasr Ben Ghashir Detention Center, where some 890 refugees and migrants are located. As of this report, all injured have been transferred to hospital and efforts are underway for the urgent relocation of all individuals to safer areas.
2. As the conflict continues, vulnerable persons – including displaced women, children, refugees, migrants, and persons with specific needs – are at higher risk due to their exposure to violence, increased lawlessness, shortages in basic goods such as food and water, and limited access to basic services such as healthcare.
3. 500,000 children have been affected by the present conflict, with increased levels of psychosocial stress reported by child protection partners working in collective shelters. Humanitarian actors have provided 1,400 IDP children with psychosocial care since the start of the conflict.

HUMANITARIAN RESPONSE

FUNDING GAPS

1. This figure includes only those cases that could be individually verified and should be considered a minimum

2. According to latest IOM/UNHCR figures

3. Additional 6,900 people have been assisted by other organizations
