Overview (as of 31st August 2019)

In August, partners delivered sustainable water services to more than 35,000 people through the rehabilitation of existing facilities and/or installation of new water points. Only 30,000 people were reached with sanitation services and 45,000 with hygiene promotion activities. The WASH Cluster is preparing a national level response plan against the abnormal increase of bloody diarrhea and acute diarrhoeal diseases compared to last year. The response is being prepared in collaboration with FMoH.

Important gaps persist throughout Somalia, mainly in Hiraan, rural Bay and Bakool, Gedo, Afmadow and IDP settlements in Kismayo and Nugal. Gaps are also important in WASH programme in health facilities and schools with only 9 in institutions reached with a full WASH package so far (out of 150 institutions targeted in 2019). Several assessments are currently ongoing to address the gap in terms of data availability and analysis (WASH market assessments, water points survey with SWALIM and JMCNA new analysis methodology).

# of People Reached with Access to Sustainable Safe Water Services Since January 2019
- 505,447 People Reached (Since January 2019)
- 889,357 People Targeted in 2019

# of People Reached with Access to Temporary Safe Water Services Since January 2019
- 984,747 People Reached (Since January 2019)
- 2,092,167 People Targeted in 2019

# of People Reached with Access to Sanitation Since January 2019
- 298,775 People Reached (Since January 2019)
- 1,092,456 People Targeted in 2019

# of People Reached with Hygiene Promotion Activities Since January 2019
- 954,214 People Reached (Since January 2019)
- 2,213,135 People Targeted in 2019
