Overview

- Flash and riverine floods continued to affect many parts of the country and have displaced more people in southern areas of Somalia. Since mid-August, observed river levels of the Shabelle River continued to rise with overbank spillage within Belet Weyne town could happen any time from now given the high river levels. WASH humanitarian partners have expanded flood assistance but continue to face funding shortfalls. Particular attention is necessary in provision of emergency safe water supply, sanitation, hygiene kits distribution and hygiene promotion.

- In August 2020, partners were reached 46,530 beneficiaries with access to sustainable safe water through rehabilitation, upgrading and construction of water sources while 22,155 beneficiaries were reached through emergency sanitation. Partners have also reported a total of 63,319 beneficiaries were reached with hygiene promotion activities and hygiene kits distribution. WASH partner services have also enabled 67,822 beneficiaries to access Temporary Water such as water trucking and chlorination of shallow wells and water points to reduce the likelihood of acute watery diarrhoea (AWD) and other waterborne diseases.

Funding

- Funding progress-excluding COVID-19
