Overview (as of 31st December 2019)

In December, partners reached close to 100,000 people with hygiene promotion activities and hygiene kits distribution, mainly in flood affected locations. 28,000 people have received sanitation assistance while 127,000 were reached with emergency water supply in December 2019. WASH cluster in coordination with 40 active partners and respective line ministries has successfully completed mass hygiene kits distribution and hygiene awareness campaigns that started late in October 2019 in twenty-two districts of South-Central regions.

In flood affected areas, sanitation still represents an important gap at post-flood response phase. WASH cluster needs an additional resource of $7m to rehabilitate the damaged WASH infrastructures during the Deyr 2019 floods. The required resource will complement ongoing WASH cluster partners’ responses in averting public health threats such AWD/cholera outbreaks in Somalia.
