NOTES AND DEFINITIONS

1People reached is the number of people provided with humanitarian assistance by one or more sectors (Food Security, NFI/Shelter, CCCM, WASH, ERL, Education, and Nutrition) for the month, taking the highest sector per community. People reached does not necessarily mean that all of their humanitarian needs are fully covered.

ACCESS STATUS DEFINITIONS:

Besieged areas: An area surrounded by armed actors with the sustained effect that humanitarian assistance cannot regularly enter, and civilians, including the sick and wounded cannot regularly exit the area. The current besieged list is updated as of April 2017.

Hard-to-reach areas (HTR): An area that is not regularly accessible to humanitarian actors for the purpose of sustained humanitarian programming due to the denial of access, including the need to negotiate access on an ad hoc basis, or due to restrictions such as active conflict, multiple security checkpoints, or failure of the authorities to provide timely approvals. The current list is updated as of April 2017.

Militarily encircled: These are communities subject to specific access constraints because they are militarily encircled, i.e. physically surrounded by single or multiple armed actors, with the effect of constraining access for both supplies and people to and from the area, such that sustained humanitarian programming is not possible. The current list is updated as of April 2017.

DELIVERY MODALITY DEFINITIONS:

Regular Programmes: Planned deliveries from the Syria hub that target people based on sector plans in government-controlled areas.

Cross-line: Deliveries from the Syria hub to areas not under Government control, mainly to people in hard-to-reach or besieged areas.

Airdrops: Deliveries from the Syria hub that target the Deir-Ez-Zor besieged area.

Cross-border: Humanitarian services and assistance sent by cross-border hubs (Jordan, Turkey and Iraq) to support regular programmes based on sector/cluster plans in NSAG-controlled areas.

Food basket figures represent people assisted with food basket, cash & voucher lifesaving assistance. Moreover, 2.6 million people were assisted through other types of assistance such as bread distribution, cooked meals, flour distribution to bakeries, mixed food items, ready to eat foods (RTE), bread, supplementary food baskets, and wheat flour distribution.

Agriculture and livelihoods: This figure includes agricultural inputs, small-scale food production, livestock asset restoration, animal health, income generating activities, provision of services and rehabilitation of relevant infrastructure.

NFI beneficiary needs are met with core and essential NFIs.

People reached is the maximum cumulative number of children under 5 and PLWs reached by a Nutrition activity by community by month.

Given the challenges the sector faces in measuring individual beneficiaries, the indicator for the number of medical procedures is used as an aggregate indicator that serves as a proxy measure for overall progress in health service delivery in Syria (medical procedures are an aggregate indicator that includes outpatient consultations at primary health care units and hospitals, number of referral cases, mental health consultations, trauma cases, persons with disabilities supported and deliveries by a skilled birth attendant.

Protection figures represent the total number of distinct protection interventions conducted through the sector’s prevention, response and capacity building activities. The figures in this product include achievements from child protection (CP), gender-based violence (GBV) and mine action areas of responsibilities (AoRs).

Food assistance includes food baskets, bread/wheat flour, cash/vouchers lifesaving and emergency food rations.

HIGH SEVERITY COMMUNITIES NOT REACHED:

Communities not reached, as reflected in the map, were not reached by the sectors defined in footnote 1.

Besieged locations are grouped into clusters for official UN classification. The list here includes detailed list of locations within those groups/clusters.

Contested areas are areas of active conflict such that the influence cannot be determined.

Notes on people targeted/reached by sector

- Displacements reported to and verified by the CCCM Cluster from April 2015 to present is 3.2 Million
- Average food baskets: 5,301,222 people and cumulative emergency food rations: 994,065 people. Percentage reach against target based on regular food basket distributions.
- The sector targets the estimated 7 million food-insecure people (HNO 2017) and an additional projected 1 million people from the caseload of emergency response (based on needs) to shift from short-term support to longer-term regular assistance until needed.
- WASH PiN and target represents the WASH sector response to the acute humanitarian needs.

LIMITATIONS:

- The reporting of “people reached” does not convey the type, scale and quality of assistance people have received. For example, people could have been "reached" through a delivery of a pack of NFIs or a complex protection intervention.
- There is a high likelihood of under-reporting of NGO cross-border work, especially the reach of projects by Syrian and International NGOs from Turkey, as well as the humanitarian assistance delivered from Iraq and Lebanon.
- The information in this report does not include the Syrian Arab Red Crescent assistance that is not funded by the UN.
- The report does not cover ICRC or Turkish Red Crescent assistance.
