

Yobe State Cholera Outbreak Situation Report

No. 54: 12th November 2018

Yobe State Ministry of Health

Highlights:

- 0 case was reported.
- 0 death was reported.

Epidemiological Summary:

The total number of suspected cholera cases reported in Yobe state is 1,777 with 61 associated deaths (CFR 3.43%). In the state, 584 cases have been reported in Gulani LGA, 485 cases in Gujba LGA and 460 cases in Damaturu LGA. In Fune LGA, 181 cases were reported and 67 cases were reported in Potiskum LGA.

Out of 112 samples collected and tested using cholera RDTs, 97 (86.6%) were positive and 15 (14%) were negative. Again, 9 (47%) out of 19 samples cultured were positive for *Vibrio Cholerae*. However, the 9 positive samples were taken to national reference laboratory for quality checks and further analysis samples and *Vibrio Cholerae* O1 (Inaba) serotype was isolated in 4 out of the 9 samples.

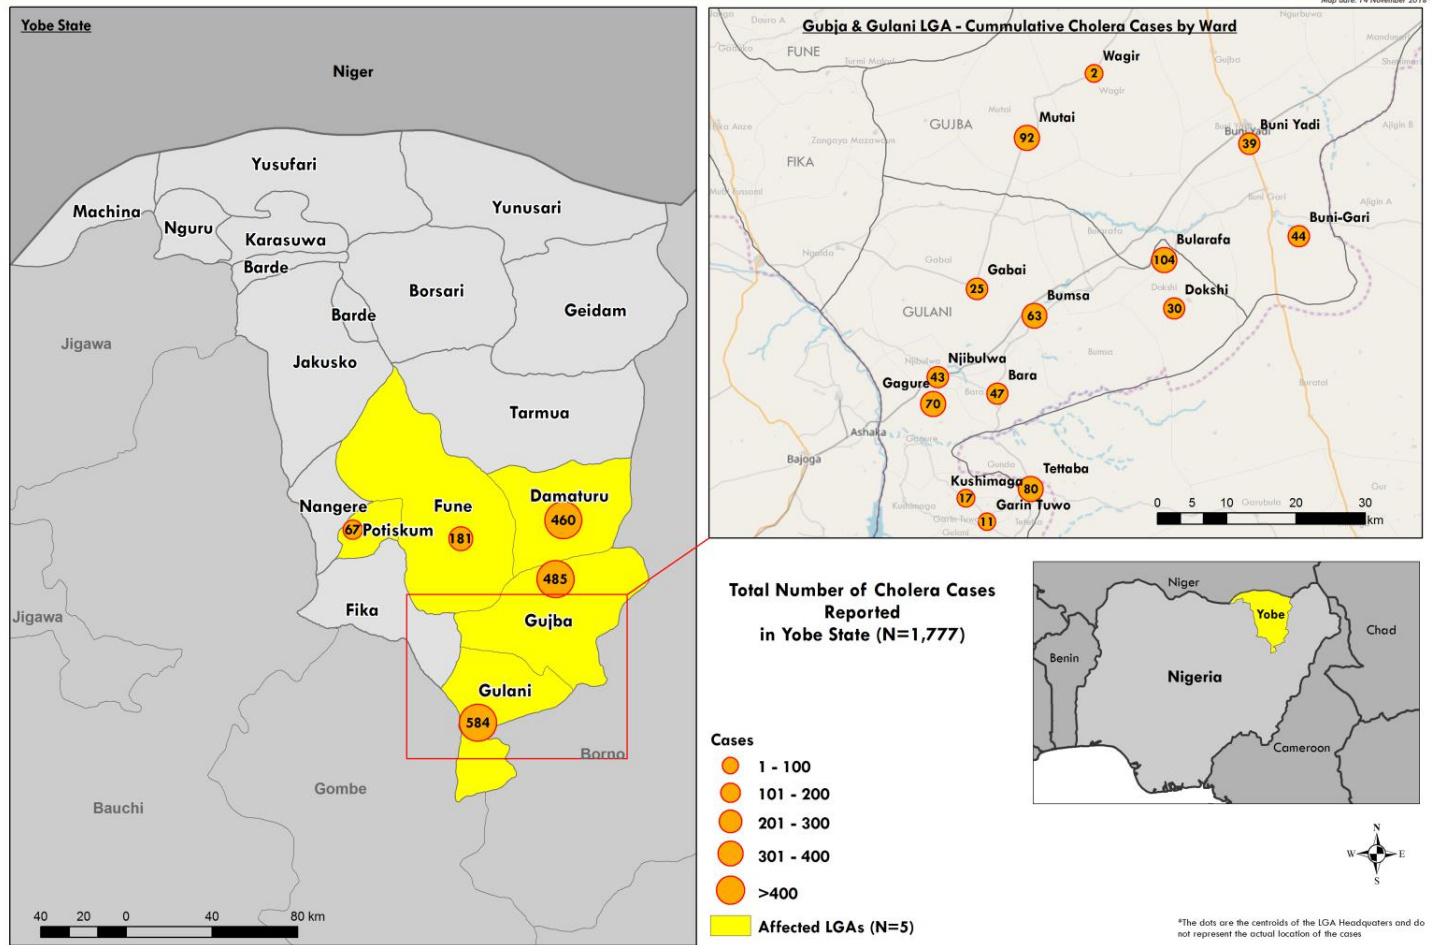

Table 1: Summaries of suspected cholera cases in Yobe State from July to 12th November 018.

	Gulani	Gujba	Damaturu	Fune	Potiskum	Total
Cases						
New suspected cholera cases	0	0	0	0	0	0
Cumulative suspected cholera cases	584	485	460	181	67	1777
Number of wards in the LGA	12	10	11	13	10	56
Number of wards affected	10	8	11	9	10	48
Deaths						
New deaths	0	0	0	0	0	0
Cumulative deaths	20	19	6	12	4	61
Laboratory						
Number of specimen tested (RDT)	32	13	55	12	0	112
Specimen Positive RDT	29	12	47	9	0	97
Pending result for RDT	0	0	0	0	0	0
Number of samples cultured	5	8	5	1	0	19
Specimen Positive Culture	2	4	2	1	0	9
Pending result for Culture	0	0	0	0	0	0

No new suspected cholera case was reported in Yobe state on 12th November 2018, showing a decline in number of cases reported compared to that previous day (Fig. 2).
